

Installation

1. **Go to Plugins > Add New** on your WordPress site.
2. Enter **WooCommerce BuyItInstalled** in the Search Plugins bar or use the zip file provided by our team.
3. Click **Install Now** and **Activate**.

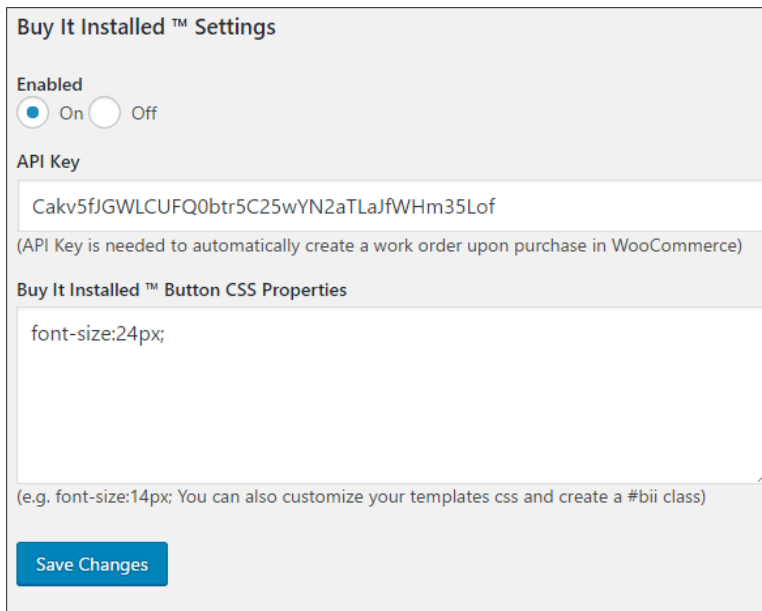

Setup and Configuration

1. Login to www.buyitinstalled.com with your account, and go to **My Profile >User Profile >API**

The screenshot shows the 'API' section of a user profile. It includes a heading 'API', a subheading 'Use our API to connect to the Buy It Installed Button and automatically create workorders.', a text input for 'API Key' with the value 'Not Generated', a text input for 'Current Password', and a blue button labeled 'Generate API Key'.

2. Select **Generate API Key**
3. Go to: **Wordpress Admin > Buy It Installed**

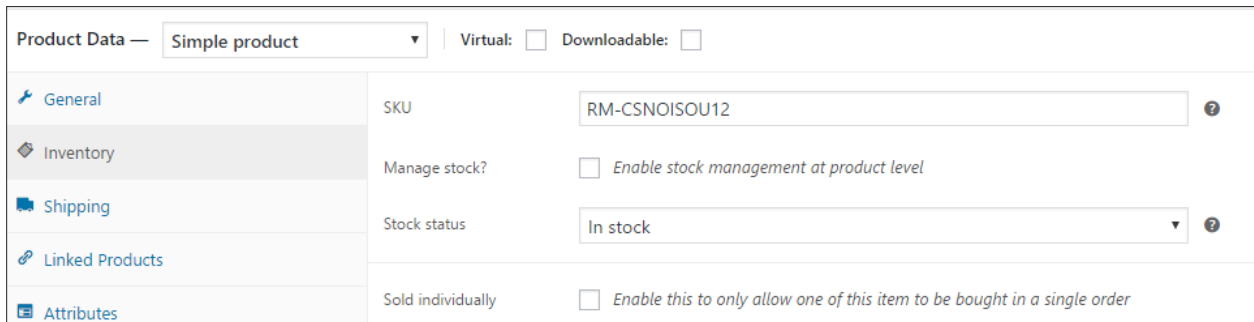

The screenshot shows the 'Buy It Installed™ Settings' page. It has a section 'Enabled' with radio buttons for 'On' (selected) and 'Off'. Below is the 'API Key' section with a text input containing 'Cakv5fJGWLUCUFQ0btr5C25wYN2aTLajfWHm35Lof' and a note '(API Key is needed to automatically create a work order upon purchase in WooCommerce)'. The 'Buy It Installed™ Button CSS Properties' section has a text area with 'font-size:24px;' and a note '(e.g. font-size:14px; You can also customize your templates css and create a #bii class)'. At the bottom is a blue button labeled 'Save Changes'.

4. Select On in the Enabled settings. Untick to disable when necessary.
5. Copy and paste your **API Key** generated in Step 2.
6. **Buy It Installed™ Button CSS Properties** lets you choose the style of the button. Replicate the style of your Add to Cart button and place it directly under or to the right of it.
7. Select **Save Changes**.

Using the Plugin

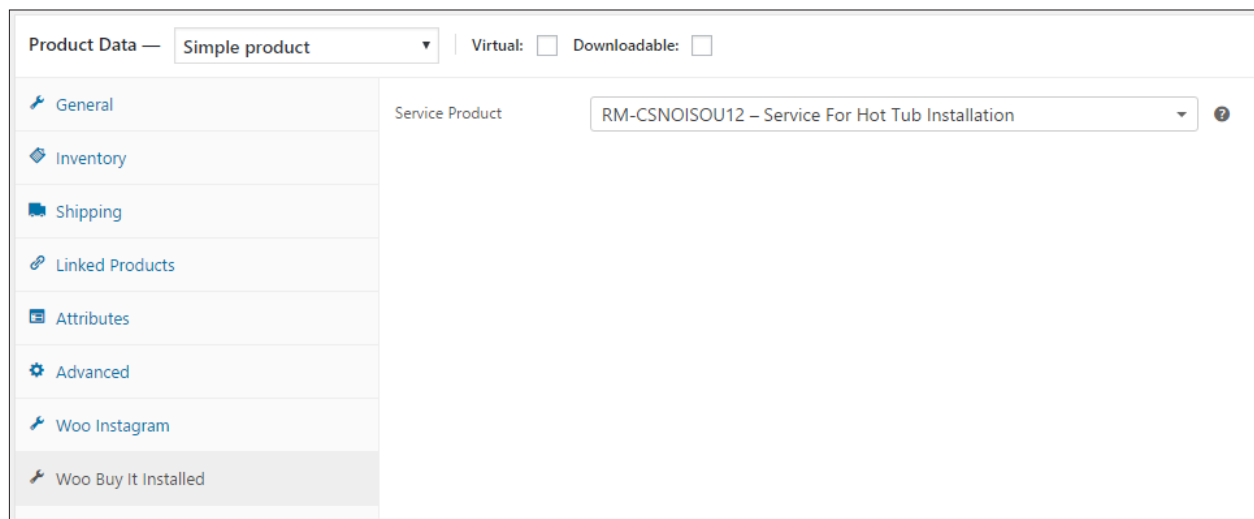

1. Create a new product in WooCommerce for the service SKU.
2. Set the price that corresponds to the service SKU.
3. In the Service Product field, add the service description that you download from your Buy It Installed™ portal.
4. Under the **Product Data >Inventory** enter the service SKU code.

Product Data — Simple product | Virtual: ☐ Downloadable: ☐

General	SKU	RM-CSNOISOU12
Inventory	Manage stock?	<input type="checkbox"/> Enable stock management at product level
Shipping	Stock status	In stock
Linked Products	Sold individually	<input type="checkbox"/> Enable this to only allow one of this item to be bought in a single order
Attributes		

5. Now for whatever product you want to offer an installation service, you will need to link it to the service product you just created. Go to your product, and go to **Product Data>Woo Buy It Installed** and link the corresponding service.

Using the Plugin

Now that you have successfully integrated our button with your site, it should properly load the UTC and add both items to the cart when selected and your product page will also include the service description in addition to the product description.

		Product	Price	Quantity	Total
✖		Hot Tub Product	\$1,999.00	1	\$1,999.00
✖		Service For Hot Tub Installation	\$399.00	1	\$399.00
Coupon		APPLY COUPON	UPDATE CART		

With every order that includes installation, the plugin will be able to automatically create a service work order at www.buyitinstalled.com.
